

DISCUSSION AND CONCLUSIONS

The purpose of this study was to explore young children's perceptions of the Earth. The results of this study indicate that young children have a limited understanding of the Earth. They do not understand the Earth as a planet, but rather as a flat surface. They do not understand the Earth as a sphere, but rather as a flat surface. They do not understand the Earth as a globe, but rather as a flat surface. They do not understand the Earth as a planet, but rather as a flat surface. They do not understand the Earth as a sphere, but rather as a flat surface. They do not understand the Earth as a globe, but rather as a flat surface.

The results of this study indicate that young children have a limited understanding of the Earth. They do not understand the Earth as a planet, but rather as a flat surface. They do not understand the Earth as a sphere, but rather as a flat surface. They do not understand the Earth as a globe, but rather as a flat surface. They do not understand the Earth as a planet, but rather as a flat surface. They do not understand the Earth as a sphere, but rather as a flat surface. They do not understand the Earth as a globe, but rather as a flat surface.
